## WORK EXPERIENCE

### Webkorps Services India Private Limited

Associate Software Engineer (ROR)

07/2022 - Present

Indore

WebKorps is a website designing and development company providing IT services to the business across the world.

Achievements/Tasks

- Here, I developed numerous APIs, including those for parking management and student notices, among others.
- The implementation of redis, resque, stripe, active storage, csv, elastic search, and the creation of models, controllers, and their templates were all done in a large number of projects.
- Written various test cases using rspec in rails.
- Deployed projects, created EC-2 Instance on AWS.
- Recognising how to debug the Rails application form console.
- Establishing real-working projects, resolving issues, and debugging the rails application.
- Involved in the end-to-end software development life cycle, using an Agile methodology.
- Experience in implementing a JWT-based authentication mechanism.
- Worked on Git, GitHub, and Amazon EC2.
- Developed website using Ruby on Rails on Linux/Mac operating system, backed by MySQL, Psq and Mongo DB.

Django

## PERSONAL PROJECTS

### Colony Management (11/2022 - 12/2022)

- A colony management application is used to manage colonies, keep up with expenses, and manage the residents. Residents can also file complaints and offer suggestions pertaining to their colonies.

### Parking management API (09/2022 - 09/2022)

- It's a parking management API that uses the devise gem for authentication and the CanCanCan gem for authorization. The user has three roles, and as a result, he has the authorization, and the payment is made using the stripe gem in accordance with the time slots assigned to the vehicles.

### ToDo list (09/2022 - 09/2022)

- A to-do list application is a task-scheduling user interface where users can assign tasks to be completed, check them once they are finished, delete them, and add comments.

### Twitter Clone (10/2022 - 10/2022)

- A Twitter clone is a programme that enables users to log in, tweet, comment on other tweets, delete their own tweets, manage their tweets, and access their profile information.
